

JOHNSON 'HUMPER' MK100

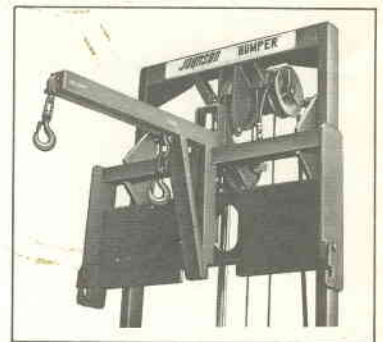

the contractors' fork lift with 'off the road' versatility

28 in and 45 in Forks carry 1 ton load at maximum height of 10 ft.

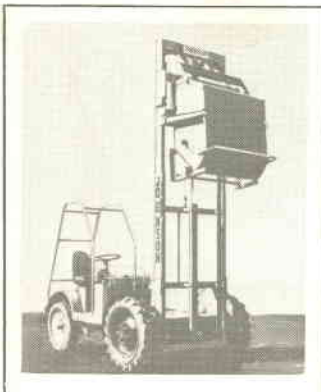

- Power Unit**—Petter PH2, aircooled diesel giving 15 bhp. Gear driven hydraulic pump. Constant mesh gearbox. Heavy duty single plate clutch.
- Driving Axle**—3½ ton rating, fully floating and double reduction driving heads.
- Mast**—rakes back through 40° to ensure load stability in transit.

2-hook crane jib

The Johnson Humber is no ordinary fork lift. It has been ruggedly designed and built specially for contractors—with its various attachments it has unlimited site applications. It can be used as a raking mast fork lift; as a mobile crane with two-hook jib; for multi-skip handling of free-standing crane skips; for handling free-standing tipping skips; for the Johnson special concrete tipping skip and for pallet handling. The versatile Humber can solve on-site unloading and distribution problems to save both time and money. And its made by Johnson—that means its built to last.
